

We know the ins and outs of keeping your data secure.

Bernstein Shur offers a new comprehensive service to help protect all of your sensitive information and data from intentional or accidental exposure and theft, as well as ensures your firm is following best practices to comply with ever-changing privacy and data security regulations.

In today's fast paced digital landscape, it's critical to stay up to date with technology that supports your business objectives and provides a competitive advantage. Our unique offering addresses both the technical and legal aspects surrounding all of your technology needs.

Legal services cover:

- Insurance
- Federal, state and international obligations
- Contractual and customer obligations
- Vendor and third party contract reviews
- Full service data breach assistance

Technology consulting services:

- Virtual CIO
- Technology solution review
- Policies and procedures review
- Outsourced provider audit
- Cybersecurity strategy

Virtual CIO

If it's not practical to have a dedicated senior IT leader within your organization, our team can provide the proper technology guidance and support. Our program consists of a comprehensive review of your current technology usage and systems to ensure they are properly aligned with your short and long term business objectives, followed by development of a detailed roadmap, along with milestones for progress.

Technology Solution

Our cybersecurity group will vet your existing technology solutions (whether large, small or unique) including servers, networks, security, storage, backup and performance data, and Cloud use, to help refine and select the best integrated approach and platforms for your business.

Data Breach Management

Whether you're concerned your systems or data are vulnerable to unauthorized access, or if your organization is the victim of a data breach, we can provide legal counsel and immediate full service assistance to mitigate the damage. We'll help you meet notice obligations, advocate on your behalf with vendors and insurers, defend you in the event of litigation, and help you strategically minimize public exposure. Most important, we'll work with experienced technical professionals to determine the cause of the breach in the first place, so we can help you avoid another one.

Vendors and Third Parties

Have you wondered what your vendor contracts say about privacy and data security? We can help you review current contracts and ensure the terms and provisions protect your interests to the extent possible, and your company is in compliance with applicable federal regulatory requirements for contracting, particularly with respect to data confidentiality and security. We'll verify your data is accessible, used only for authorized purposes, and is handled and shared responsibly. In the event of a data breach or other mishandling of confidential data, we'll provide prompt and efficient guidance and support, from internal audit through final disposition, including recommending important mitigation steps, and making sure you are in compliance with federal and state reporting and notification requirements.

Josh Silver
jsilver@bernsteinshur.com
207 228-7263 direct

As a shareholder and co-chair of the firm's Data Security Team, Josh negotiates some of the most sophisticated and complex technology transactions on behalf of large and small companies and financial institutions, helping them protect valuable data assets with best-in-class technology licensing and infrastructure services. From years of experience, Josh knows how to eliminate the kind of contractual ambiguities that can lead to costly disputes down the line, and frequently assists clients with data breach response measures and the negotiation of technology licenses and related services.

Matt Kramer
mkramer@bernsteinshur.com
207 228-7151 direct

Matt has over 20 years of IT experience in the legal and higher education industries. In his role as CIO at Bernstein Shur, he oversees all aspects of the firm's IT operations in support of the business. He has a proven track record of improving service delivery and developing custom solutions, all while maintaining security, stability, and reducing costs. Matt has managed large and complex networks for Boston University, and tackled the rigors of risk and compliance management with Bernstein Shur. He has presented at national conferences on a broad range of topics including Virtual Desktops, Disaster Recovery, Mobile Security, and Software Development.
